Double Guarantee

First—We guarantee the Vitality and Purity of our Seeds, Bulbs and Plants to the full amount of the purchase price. Even with the highest quality of Seeds, success depends largely upon soil, not too deep or too shallow planting, cultivation and weather conditions. It is, therefore, agreed that in no case shall we be liable for more than the amount actually paid, and if not accepted on these conditions, they must be returned at once.

When you receive Plants or Bulbs from us they are in a dormant condition as provided by Nature, to rest and sleep over the winter. And if they have no foliage don't consider them dead; they are resting and are well prepared to start growth when spring comes.

To guarantee the life of plants and bulbs in the hands of another person and make the Seed House responsible for the errors and inexperience of others, not to mention the freaks of nature and unfavorable seasons, bad soil, unsuitable locations and many other conditions over which the Seed House has no control is very unreasonable, and the Seed House cannot become responsible for the future life and conduct of a live plant or bulb received in good condition, and if not accepted on these conditions they must be returned at once.

Second—We guarantee the safe arrival of all Seeds, Plants and Bulbs in good condition, and should anything be damaged, dead, or lost on the way we will refill when proof is furnished. This is the Double Guarantee that protects all who purchase Mills Seeds, Plants and Bulbs.

Our Motto

"Never send out any Seeds, Plants or Bulbs except such as we ourselves would be thoroughly satisfied with, were the position of buyer and seller reversed."

LOOK

Read this SEED BOOK all through — Note the many NOVELTIES, SPECIALTIES and STANDARD VARIETIES offered and the attractive prices. Every variety has been tested and we guarantee high quality of stock and strong germination.

MILLS SEEDS can be had only direct from Mills Seed Houses, Rose Hill, N. Y., and we are giving more SEED this year at the new prices than ever before in our forty-five years of Seed Growing.

We are also making an UNUSUAL ANNOUNCEMENT below, which will be of interest to all our customers and hope all flower lovers everywhere will assist us in this experimental work.

Have You Heard About the NEW FLOWER — A FRAGRANT GLADIOLUS?

For a long time breeders of new plants have been trying to produce a FRAGRANT GLADIOLUS that may be grown under the same conditions as the general run of garden varieties.

Discovery of what is believed to be the first Fragrant Gladiolus was announced a year ago by a well known Gladiolus Grower who is carefully guarding his discovery, the result of several years of experimenting.

We gave some of this Grower's Bulbs a trial the past season which proved quite satisfactory in growth and fragrance but we believe there is an opportunity to greatly improve on the fragrance.

Of course it is now in its first stages of development as to fragrance, which some say is like a Honey Dew, while others have characterized it as similar to that of a Lotus, and still others declare the fragrance resembles a Rose.

We wish to inform our customers that we are now working to develop a New Fragrant Gladiolus from a large number of Seedlings we have selected for that purpose, and ask all flower lovers in all parts of the world to assist us in this work with the hope that a fragrant specimen will be produced.

\$100 CASH FOR ONE BULB

We want to introduce a Fragrant Gladiolus and will pay \$100 for the bulb producing the most fragrant bloom, grown from any of our Selected Gladiolus Seeds or Bulbs.

If a Fragrant Gladiolus Bloom is produced from any of our Seeds or Bulbs, grower should notify us by mail or otherwise, and we will record the date and time we receive such notice so this grower will be on record. Then let the Bulb producing the fragrant bloom mature, and before frost dig this bulb and mail it to us with grower's name and address.

On receipt of all Bulbs from Growers claiming they produced fragrant blooms we will carefully hold in storage, and at proper time in spring plant them all in our Experimental Gardens, and if the bulbs produce fragrant blooms as claimed, \$100 will be sent the person whose bulb produced the most fragrant bloom.

The decision as to what shall be considered the most fragrant bloom will be made by a committee of 3 Horticulturists named by the President of F. B. Mills Seed Grower, Inc., and their report will be final and will be published in Mills Annual Seed Book, giving name and address of person receiving the award.

If more than one Gladiolus Bulb received for the Fragrant Bloom Contest produces fragrant blooms in our Experimental Gardens, we will return such bulbs, soon as matured, to the senders, awarding the \$100 to the winner selected by the Judges under these rules. Closing date November 1, 1933 for all bulbs to be sent in.

New Annual Canterbury Bells

Blooms from Seed in Less Than 6 Months

This new annual now gives us the beautiful Canterbury Bell the same season from early, spring sown seed, a wonderful achievement, as the old-fashioned biennial of our Mother's garden did not bloom until the second year. This new annual flowers in colors of dark blue, light blue, pink, rose and white, the stately plants 2 to 2½ feet tall, each with 6 to 8 spikes of bloom. We believe this to be a very fine Novelty and will greatly please our customers.

All colors mixed: Pkt. (300 seeds), 10¢; 3 pkts., 25¢.

Giant Double Annual Larkspurs

Recent years have brought great improvements in Larkspurs, a most popular garden plant, as seed sown last of April brings flowers in July, and this mixture we offer is from only the best late developments which produce beautiful colors in the Giant Double type. The full spikes with beautiful all double flowers keep blooming till frost and are supreme for cutting. The colors in this mixture are simply gorgeous, and anyone can grow them as they thrive in most any soil.

Nasturtium—Golden Gleam

Double Sweet Scented Nasturtium — Golden Gleam

We feel sure this new Nasturtium DOUBLE FLOWERING and SWEET SCENTED will be greatly loved by all, being as easy to grow as the ordinary kinds. The flowers come as soon as the plant nears development and when in full bloom the plant is a blaze of color in golden-yellow flowers on erect stiff stems 6 inches in length, standing well above the foliage. It gives us great pleasure to offer this exquisite and unique novelty for the first time and feel assured, having grown this new Nasturtium in our Testing Gardens, that our customers will share with us the pleasure to be had from growing this fragrant double flowering Nasturtium, from which an ordinary bouquet left for a short period of time will fill the room with fragrance. When fully developed the plant sends out short runners, also bearing numerous flowers, which make it attractive for a window box. Golden Gleam also makes an excellent pot plant, by clipping the runners which make a rounded mass of golden flowers.

Beautiful Dahlias can be grown from seed and the plants will bloom from 3 to 4 months after planting. Anyone who can raise a zinnia or aster can grow Dahlias from seed. Some of the finest large Dahlias and richest colors have been found among seedlings, and it is very doubtful if there will be any two alike from a packet of seed. The varieties of color are wonderful and there is no flower more interesting to grow. We have made up a special mixture of both single and double varieties. Plant in rich, deep soil, give good cultivation, and you will be pleased with the results.

Wilt Resistant Asters

FOR several years we have been working to get a strain of Asters resistant to the Fusarium Wilt disease which has caused so much trouble to both amateur and professional growers in recent years.

The plants have been stricken with the wilt at any stage of their growth, from the seedling to the flowering stage, and as yet no method of control has been discovered.

It is believed prevention through highly wilt resistant strains is the only method of controlling the disease.

We are offering a special mixture of the large flowering Asters, all grown from wilt resistant stock, which we believe will be perfectly immune to this disease.

This mixture of Aster seed is made up of the different colors in such varieties as Crego, Comet, Royal, Ostrich Feather, Upright Branching, Astermum, American Branching, Quilled, Early Beauty, Sensation, King and others.

Asters are still the most popular of our Autumn annuals, and we believe this Wilt Resistant Strain we offer this season for the first time will prove a great success and be greatly appreciated by our customers.

ply of flowers may be had throughout the blooming season.

These 30 Bulbs vary in size, some varieties produce much larger bulbs than others, so you cannot tell which size bulb will produce the most beautiful flower, but every bulb should give a beautiful bloom.

Plant these bulbs any time in spring when ground is suitable up to as late as June 15th.

Read our Special Offer below.

Use Mulch Paper for Earlier and Larger Blooms

We have found by using Mulch Paper in growing Gladioli that earlier and larger blooms are produced.

The photograph on the right shows results in our trial grounds. These bulbs were all planted the same day, and this photo was taken July 30th.

The bulbs in the right hand rows were planted through holes in Mulch Paper and no hoeing, weeding or watering was necessary all summer.

The bulbs in the left hand rows were planted in the ordinary way and had to be hoed and kept free from weeds all summer. Notice the difference.

The use of Mulch Paper has opened up a new way to grow Gladioli for results so far clearly indicate that Mulch Paper stimulates and brings about greater plant growth.

The reason why Mulch Paper makes earlier and stronger plants is that it covers the soil, checking evaporation, thereby needing no watering, no hoeing, no weeding, and the soil does not get dry, crusty and lumpy. The soil is always mellow, moist and warm under Mulch Paper. It keeps down weeds and grass, and warms the soil because it is black and draws the sun's heat, making soil several degrees warmer in day and holds heat in soil at night. Try Mulch Paper this year—read our Special Offer below.

SPECIAL OFFER

We will mail this RAINBOW COLLECTION OF 30 GLADIOLUS BULBS, no two same variety, and include FREE a roll of Mulch Paper sufficient to plant these 30 bulbs with instructions for planting, all for only \$1.00 postpaid.
